So Many Changes!

In Phase I, with I-64 frontage, Alliance Management Company purchased 7.2 acres and has started construction on a new **Xscape** Multi-Plex movie theatre directly across from the FBI's regional headquarters.

In Phase II, **Noah's All Life Event Center** will build their new 10,000 square foot event venue on 2.13 acres on Plantside Drive next to Van Zandt Emrich and Cary. Construction should begin this season.

Donan Engineering plans to build a new corporate office facility near Kelley Construction along Lake Station Place. Donan began their engineering firm in 1947 and are one of the largest forensic investigation firms in the country. They have more than 50 offices nationwide.

Eurofins purchased 3.94 acres on Plantside at Schutte Station Place. They

are an international group of laboratories headquartered in Luxembourg, providing testing and support services to the pharmaceutical, food, environmental and consumer products industries and to governments.

We hope you've driven down Plantside Drive and seen the new **Rev-A-Shelf** facility currently under construction. The 315,000 square foot facility, on Earl Jones Way, is anticipated to be completed Winter 2015.

The **Plantside Drive extension** is proceeding according to plan. We hope to complete the extension from Plantside to Urton Lane at Rehl Road in the summer of 2015.

There is quite a bit of buzz all over the park as there are more than 54 combined acres under contract...with more to come!
